📁 Portfolio

Professional Summary

Front-end developer with 3+ years of experience building scalable web applications using React.js, TypeScript, and modern UI libraries. Skilled in performance optimization, reusable components, API integration, and cross-functional collaboration. Proficient in UI/UX best practices and state management.

Work Experience

Software Engineer

Aug 2023 – Present

Torry Harris Integration Solutions, Bengaluru

- Developed and maintained scalable, high-performance web applications using React, JavaScript (ES6+), HTML5, CSS3, and modern frontend architecture patterns.
- Optimized frontend performance through browser caching, lazy loading, code splitting, memoization, and React Query, achieving 30–40% faster page load times.
- Implemented efficient state management, data fetching, and API integration using RESTful APIs, improving application responsiveness and data flow.
- Led code reviews and enforced frontend best practices, clean code principles, and design patterns, reducing production bugs by 25% and improving maintainability.
- Evaluated, tested, and integrated third-party libraries and UI frameworks, improving developer productivity by 15% and ensuring long-term scalability.
- Designed responsive, accessible, and cross-browser compatible UIs, following mobile-first design and modern CSS standards.
- Implemented internationalization (i18n) and localization support to enable multilingual user experiences.
- Identified and resolved performance bottlenecks, memory leaks, and UI defects, reducing bugs by 35% and improving application stability.
- Actively participated in Agile/Scrum development, including sprint planning, daily stand-ups, retrospectives, and backlog grooming.
- Managed and mentored a cross-functional team of 5 developers, conducting pair programming, technical reviews, and knowledge-sharing sessions.
- Delivered a React-based marketplace portal, ensuring on-time releases, high code quality, and scalability.
- Refactored legacy codebases to reduce technical debt, improve code readability, and enhance application scalability and performance.
- Collaborated closely with backend, QA, product, and design teams to translate UI/UX designs into high-quality production code.

Intern

Feb 2023 – May 2023

LTIMindtree

- Developed backend-focused Java and C++ apps to demonstrate core concepts in system-level programming.
- Deployed and managed cloud apps on AWS using EC2 and S3, gaining real-world experience in cloud deployment.
- Automated infrastructure provisioning using Terraform, applying Infrastructure as Code (IaC) practices.

Projects

Torryharris Marketplace

AI-based platform for digital marketplaces. Contributed to the UI, architecture, and API integration.

Tech: React, Redux Toolkit, Tailwind, REST API

Coupler

Low-code tool to build microservices with visual integration. Led front-end development and component design.

Tech: React, TypeScript, ShadCN UI, Vite

Skills

Frontend: React.js, Redux, React Query, Tailwind CSS, Ant Design, HTML, CSS, JavaScript, TypeScript, Next.js, Styled Components, Zustand, Recoil, TanStack Query, Responsive Design,Webpack, Babel, vite

Backend: Express.js, Node.js, PostgreSQL, MySQL

Tools: Git, GitHub, GitLab,CI/CD (GitHub Actions, GitLab CI/CD), Figma, Notion, Jira

Other: REST APIs, Stripe/Razorpay Integration, i18n, Docker, Kubernetes, Cross-Functional Collaboration, Documentation, Business Logic Understanding, MVP Iterative Development, Scaling and Performance Considerations

Education

B.Tech in Computer Science and Engineering

2019 – 2023

Mahatma Gandhi Institute of Technology, Hyderabad

Awards and Certifications

- Star Performer of the Quarter
- Meta: Front-End Developer
- Google: Data Analytics
- NPTEL: Cloud Computing
